DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Krammer et al 2001/0021387.

The cited prior art discloses an organopolysiloxane-modified polysaccharide comprising esterification reacting an organopolysiloxane having residual carboxylic anhydride groups and a polysaccharide. The prior art discloses in paragraph [0019] that the functional group on organopolysiloxane is selected from the group consisting of acid anhydride groups. Paragraph [0024] also discloses the types of saccharides contemplated, including those as claimed. Characteristics not expressly disclosed, such as the structural units of the half ester as claimed, would have been inherent in the prior arts disclosure of the use of acid anhydrides.

3. Other references listed on PTO-892 have been made part of the record.
